

Gib-San Custom Concrete Pool - Fast Facts

Company:

Gib-San is thrilled to provide this beautiful concrete pool for the Princess Margaret Home Lottery Oakville Showhome! Gib-San has been building pools for facilities and families nationally and internationally for over 50 years. Our company is proud to announce that it has been ranked 4th in the top 50 pool builders in North America by Pool and Spa News Magazine (U.S. Publication, 2020) – the only Canadian company to make the list!

This Princess Margaret Home Lottery Oakville Showhome Pool Features:

Design:

This pool features an elegant oval design inspired by the European style of the Princess Margaret Home Lottery Oakville. This pool has been designed to suit the backyard space and home architecture. The poolscape includes a gorgeous Pebble Technology cast stone ebony water bowl to create a serene and Zen water escape. The 3-foot-deep shallow end of the pool is equipped with corner steps for easy access. With a 5-foot-deep end, there is an area to be completely submerged and is ideal for swimming laps or jumping right in! This resort style cocktail pool is sure to provide enjoyment for everyone for years to come!

Shell Structure:

The uniqueness of the concrete (shotcrete) shell is that it is hand sculpted. The shell is shot with high velocity air and concrete before being hand-trowelled to prepare for tile and the plaster finish.

Finish:

The interior of the swimming pool has a beautiful 12" by 24" polished porcelain waterline tile that simplifies maintenance and is aesthetically pleasing. The interior of the pool is finished with the incredible "Speckled White" Pebble Technology product, the most luxurious and durable finishes available in the marketplace. Pebble Technology offers a durable non-slip surface, durability, and beautiful appearance.

Equipment: **DESIGNED TO SAVE YOU MONEY!**

This custom Gib-San system uses the latest technology and innovation with pumps, filters, lighting, and sanitation to deliver the most efficient and cost-effective way to operate a pool. An energy efficient system saves energy, conserves water, and reduces noise.

Pump, Skimmer, and Heater: The gas heater makes the temperature of the water easily adjustable to extend your swimming experience.

Filter and Chemicals: The end result is a cleaner and clearer swimming experience for your family with no harmful by-products.

Lighting: The LED lighting makes poolside evenings go from great to spectacular. The lighting on this pool is the brightest and most efficient LEDs available.

Cover: A cover is included.

Cleaning/Maintenance: A vacuum and skimmer are included for cleaning and testing the water once per week. Pool maintenance/service packages are available for purchase. Gib-San looks forward to building a long-term relationship with the lucky prize home winner.

Congratulations!

A Gib-San concrete pool is highly sought after for its architectural and structural beauty. This pool at the Princess Margaret Home Lottery Oakville Showhome is built to last for generations to come. We are pleased to congratulate the winner on their Gib-San Pool and the entire Gib-San team wishes you a lifetime of memories and happiness in your very own backyard resort.
